Press Release

SINA Managed Service: Utilisation instead of administration

[Essen, Germany, 28 May 2024] Public authorities and companies can also benefit from the comprehensive security of a SINA solution without the need for any service outlay of their own. The SINA Managed Service offers a customised, ready-to-use solution for handling classified information (CI). To this end, secunet, Germany's leading cybersecurity company, is cooperating with CGI, one of the largest IT and business consulting companies. The joint offerings can fulfil a wide range of security requirements, up to the high classification level GEHEIM (SECRET), and expand the existing service portfolio of externally operated SINA solutions.

Strict regulations apply to the handling of CI of different classification levels. Thanks to SINA, public authorities have been able to securely process, store and exchange digital CI in accordance with these requirements for many years. With the SINA Managed Service, this is possible without the customer having to build up expertise or plan personnel for operation. For example, organisations that require a particularly high degree of flexibility or only come into contact with classified information sporadically can benefit from this. In addition to public authorities and armed forces, the offer is also aimed at small and medium-sized companies that can only provide limited resources for the operation of such solutions.

The SINA Managed Service with CGI offers a diverse range of services which are tailored to the customer's specific requirements. They range from support with the configuration and rollout of a SINA solution to the complete operation of the entire system, including the related consulting as well as first and second level support. Rental models for SINA components are also available.

Press Release

"With CGI, we are delighted to have found a partner with the necessary expertise and decades of experience in managing IT solutions in the defence and space industry to expand our managed service offering in the environment of classified information and high security," says Torsten Henn, COO at secunet. "SINA is therefore also relevant for organisations for which setting up and operating their own SINA infrastructure is not an option."

"The new SINA Managed Service from secunet and CGI will greatly relieve the burden on our customers' internal IT capacities while ensuring the necessary quality in this security-critical environment," adds Jens Elstermeier, Senior Vice President Consulting and Head of Business Development at CGI in Cologne. "We are delighted to now be able to offer customers this comprehensive solution."

secunet and CGI are jointly offering the new services. Interested authorities and companies can contact one of the two companies.

Further information on the SINA Managed Service can be found here.

About SINA

The Secure Inter-Network Architecture SINA is a high-security solution developed by secunet on behalf of the German Federal Office for Information Security (BSI). SINA has been successfully used by authorities and armed forces in Germany and abroad for many years.

Press Release

secunet – Protecting Digital Infrastructures

secunet is Germany's leading cybersecurity company. In an increasingly connected world, the company's combination of products and consulting assures resilient digital infrastructures and the utmost protection for data, applications and digital identities. secunet specialises in areas with unique security requirements – such as cloud, IIoT, eGovernment and eHealth. With security solutions from secunet, companies can maintain the highest security standards in digitisation projects and advance their digital transformation.

Over 1,000 experts strengthen the digital sovereignty of governments, businesses and society. secunet's customers include federal ministries, more than 20 DAX-listed corporations as well as other national and international organisations. The company was established in 1997, is listed at the German Stock Exchange and generated revenues of 393.7 million euros in 2023.

secunet is an IT security partner to the Federal Republic of Germany and a partner of the German Alliance for Cyber Security.
